- AngularJS, 8
- ReactJS
- EcmaScript 6
- Typescript
- HTML5
- CSS3

Others

- Agile Methodologies
- Scrum
- Git
- Soft Skills
- Jira

EXPERIENCE

Internship Trainee

Developed a SPA multiplayer arcade game with leaderboards and ratings. The following set of technologies was used:

- | | | |
|-------------|----------------|--------------|
| • C# | • ADO.NET | • SQL Server |
| • .NET Core | • ReactJS | • SignalR |
| • EF Core | • ASP.NET Core | • MS SQL |

Junior Full Stack Developer

In my first real project I was mainly tasked to migrate a front end project from AngularJS to Angular8. The project was a system responsible for management and production(print) of debit/credit cards.

- | | | |
|--------------|--------------|----------------|
| • Javascript | • AngularJS | • SQL Server |
| • Typescript | • ASP.NET | • Gitlab CI/CD |
| • Angular8 | • SQL Server | • Azure DevOps |

Second project - Insurance web app. Together with a mid developer we split the project into 2 pieces and managed everything from clients, source code, environments, deployments, emailing systems, all maintenance, crafting acceptance criteria, features, bugfixes. In short: my eyes were opened for the entire life cycle of a project.

- | | | |
|-----------|--------------|--------------------------------------|
| • C# | • MVC5 | • Azure DevOps |
| • .NET | • JQUERY | • ISS, SMTP, |
| • ASP.NET | • SQL Server | Sendgrid,VB,
Wordpress, Concrete5 |

Full Stack Developer

As a regular developer I became part of a heavy business oriented project on the insurance, more specifically underwriting end.

- | | | |
|--------|--------------|----------------|
| • C# | • SQL Server | • Xaml |
| • .NET | • WPF | • Azure DevOps |
