## Advertise the app to the IT Society

in list [Product Backlog](#)

Labels

marketing-specialist +

### Description Edit

Make a post in DevBG and some other Dev-mama forums, make sure it looks appealing to them

## Advertise the app to the private services sector

in list [Product Backlog](#)

Labels

private-services-specialist +

### Description Edit

The private services sector may want to invite themselves to such parties in the future. Therefore they need to be aware of the app as well.

## Reach out to the private services sector and generate a list of contacts

in list [Product Backlog](#)

Labels

private-services-specialist +

### Description Edit

In order to organize private parties we will need to be able to have a list of contacts.

# Стъпки за добавяне на парти

The image displays three sequential iPhone screens illustrating the process of adding a private party. The first screen shows a list of existing parties, each with a delete icon (X), a text input field, and a chevron icon (>). A green plus icon at the bottom right indicates the option to add a new party. The second screen is the 'Add private party' form, which includes fields for Title, Address, Start time, and Information. It also features a 'Green pass' section with radio buttons for 'Yes' and 'No', and an 'Add image' section with a placeholder image. A green 'Create' button is at the bottom. The third screen shows the newly added party at the bottom of the list, highlighted with a green background and a 'private' label. A green plus icon is still visible at the bottom right.
