📍 Plovdiv, Bulgaria

SUMMARY

- **My main skills all reside in the Java Tech Stack**

- **I have worked in several different teams sizing from 3 to 11 developers.**

- **I have also worked on various projects with various complexity - from small and simple APIs to Microservices. I have modest experience in architecture and design patterns.**

- **My biggest interest (where I spent some of my free time) is in Clean Code practices, making complex problems simple, and making code more readable.**

- **Here is my GitHub (although, it is a bit outdated):**

   https://github.com/kamentr

Some of the responsibilities I've had:

1. Develop new features keeping in mind good code practices, code readability, formatting, consistency with current architecture and code simplicity.

2. Maintain, fix and improve legacy code.

3. Knowledge transfer to new members of the team.

4. Mentor Interns (give tasks, help with implementation).

5. Unit testing with at least 95% coverage.

EXPERIENCE

Java Developer
Kodar
📅 11/2019 - Ongoing   📍 Plovdiv

Intern
Kodar
📅 06/2019 - 10/2019   📍 Plovdiv

SKILLS

Spring Boot   Java   Gradle

Maven   MySQL   Spring Framework

Agile Methodilogies

Object Oriented Programming

Docker Products

EDUCATION

Computer Software Engineering
Plovdiv University 'Paisii Hilendarski'
📅 2018 - 2022

High School Diploma
English Language School
